

**Before filling out the Classification Worksheet, please read the following:**

Street Driven class was designed for people who drive their Corvette at least once or more per week. They will not get the engine or suspension judged and the hood will remain closed during judging.

If you feel your Corvette can compete with a trailered Corvette, then place your Corvette in one of the three other classes – Original, Modified or Full Custom. This is determined by the results of your honest evaluation of the points calculated based on the changes made from original.
